Central Management System

TransPorter

VNS TransPorter is a suite of portable, advanced mobile video records specially developed for vehicle surveillance solution and intelligent transportation applications. With the most advanced hardware design and comprehensive and reliable firmware, TransPorter Series MDVRs supports video recording in IP or HD analog format to ensure maximum flexibility and system security.

TransPorter support CAN-BUS and fleet management system integration to provide critical vehicle data wirelessly through connectivity via 3G, 4G and WIFI to provide maximum flexibility. With Central Management System software and remote client monitoring applications it also achieves alarm linkage, central monitoring, remote management and playback analysis.

TransPorter Series recorders are available from 2 channel compact dash mounted versions to 4 and 8 channel models using various recording media from SD card to HDD and SSD. HDD mobile DVR models utilize the industry-leading anti-vibration technology, to protect the hard disk in harsh environment on commercial vehicles, to ensure the recording reliability.

TransPorter Series recorders are also available using the most advance H.265 video compression which can save up to 50% video storage and 3G/4G data transmission that can greatly improve the ROI (Return on Investment) for customers.

TransPorter offer a wide choice of vehicle mounted cameras, accessories and specialized software for different transportation applications including, school buses, ambulances, public transportation, logistic vehicles, cash carrying vehicles, law enforcement vehicles and hazardous material moving vehicles.

OUR ARTIFICIAL INTELLIGENCE SUITE OF SOLUTIONS USING DEEP LEARNING INCLUDES

Forward Collision Warning

Headway Monitoring Warning

Lane Departure Warning

Closed-eyes Detection

Yawning Detection

Smoking Detection

Cell Phone Calling Detection
